Ysbyty Gwynedd, Bangor Hospital

New Grade B dispensary and radiopharmacy facility

The details

Our role:

Design and Build
Specialist Contractors

Scope:

M&E and multidiscipline
construction

Facility type:

Grade B,C,D Aseptic Suite

Floor area:

400m²

Contract value:

£1.5m

Programme:

8 months

New dispensary and radiopharmacy facility was contracted to Enbloc which we secured in a competitive tendering process. The new facility was built as a “turnkey” project housing Aseptic and radiopharmacy isolators within EU GMP Grade B cleanrooms.

The new facility was required to use the latest materials for the fit out works and were required to have an A+ rating in accordance with the fourth edition of the BRE Green Guide to Specification.

Enbloc’s Validation Team carried out rigorous validation including design, installation and operational qualification. The facility was designed and built in accordance with the rules and guidance for pharmaceutical manufacturing and distribution 2007 and also MHRA requirements.

Clinical trials and dispensary areas

Central aseptic suite
