

GMP Aseptic Manufacturing Unit

Portsmouth NHS Trust, Queen Alexandra Hospital

Through innovative value engineering, Enbloc successfully won the contract for this significant Aseptic Manufacturing Unit, direct with the NHS Trust. Two central cleanrooms with capacity to achieve Grade B cleanliness with 6 cutting-edge Aseptic processing isolators.

The isolators – designed and installed by Enbloc – contain rapid vaporised hydrogen peroxide gassing, enabling fast sterilising cycles. The HVAC system is dynamically controlled to ensure constant room pressures throughout the suite, regardless of Isolate cycle or filter life.

 <p>Our role: Design & Build Principal contractor</p>	 <p>Scope: M&E & Construction</p>	 <p>Facility type: Grade B Aseptic Manufacturing Unit to cGMP standards</p>	 <p>Programme: 12 months</p>	 <p>Floor area: 1600m²</p>  <p>Contract value: £2.1m</p>
