

CL3 Containment Suite

ACDP CL3 Laboratory

Enbloc were selected as the Design and Build turnkey specialist to provide an ACDP CL3 Containment Suite capable of autonomous and continuous 24/7 operation, as well as being able to be fumigated with formaldehyde, independent of the operational status of any adjacent laboratory.

As with all Enbloc’s CL3 facilities, the suite was constructed “air-tight” and integrity tested to prove compliance with regulations.

Enbloc successfully completed the full design, build and fit-out, in collaboration with the Client, to create the CL3 Containment Suite which was completed within a short programme timeframe.

 <p>Our role: Design & Build Specialist Contractor</p>	 <p>Scope: Full turnkey Fit-Out from concept to validated completion</p>	 <p>Facility type: ACDP CL3 Laboratory Suite</p>	 <p>Programme: 6 months</p>	 <p>Floor area: 50m²</p>  <p>Contract value: £400k</p>
