

Modular Cleanroom

Cleanroom Laboratory Suites

Enbloc were chosen as Principal Contractor to provide a new facility with modern and flexible cleanroom suites in a modular building at RMH Sutton. Enbloc provided Full design, construction and fit out to form new cleanroom laboratory suites together with Validation to achieve MHRA Licence.

The facility comprises: unclassified lobby and consumables store/quarantine area, separate Grade C personnel change rooms and materials airlock consisting of a common wiping-in area and separate in and out transfer hatches.

These lead into a common Grade C support area with ducted laminar airflow cabinets. This area feeds into the two Grade B Cleanrooms with ducted laminar flow cabinets providing a Grade A work environment.

The facility is finished in a fully welded vinyl finish to walls, floors and ceiling including full built in benches to minimise hard-to-clean areas.

 <p>Our role: Design & build Principal Contractor</p>	 <p>Scope: Full turnkey of new modular building and fit out</p>	 <p>Facility type: Grade B cleanroom suites</p>	 <p>Programme: 16 months</p>	 <p>Floor area: 500m²</p>  <p>Contract value: £2m</p>
