

Semi Conductor

Electronics Manufacturing

Enbloc are experienced in providing ISO5 to ISO8 facilities for wafer production and other electronic components. We are able to offer close environmental controls for temperature stability as low as $\pm 0.1^{\circ}\text{C}$.

As part of our design, we offer HAZOP studies to ensure a safe environment with the potentially challenging environments.

Our innovative designs enable energy saving with options for dynamic air change rate adjustment with feedback from room particle counters.

 <p>Our role: Design & Build Specialist Contractor</p>	 <p>Scope: Full turnkey Fit-Out from concept to validated completion</p>	 <p>Facility type: ISO5 to ISO8 facilities</p>	 <p>Programme: From 6 months depending on size and design</p>	 <p>Floor area: As per Design</p>
			 <p>Contract value: £ As Agreed</p>
